Referees for Volume 25: The Editor of *The Journal of the Geological Society of Jamaica* gratefully acknowledges the help provided by the following referees who kindly undertook thorough reviews of the manuscripts published, or considered for publication, in this volume:

Rafi Ahmad, Stephen Donovan, Grenville Draper, G.A. Goodfriend, J.P. Krijnen, Jens Lund,
David L. Meyer, Edward Robinson, Winfried Schmidt, Jeremy Woodley, Raymond Wright.

The Editor would also like to thank the University of the West Indies Publishers' Association for its help with the typesetting and layout of this volume.

THE JOURNAL OF THE GEOLOGICAL SOCIETY OF JAMAICA is published annually, except for special issues which appear at irregular intervals. The Society also publishes a quarterly Newsletter. The Journal first appeared in four parts in volume 1 in 1958, under the title GEONOTES. In 1965 its name was changed to THE JOURNAL OF THE GEOLOGICAL SOCIETY OF JAMAICA. The Journal invites research papers and review articles covering practically all the aspects of earth sciences. Preference will be given to subjects relevant to Jamaica in particular and to the Caribbean in general. The Journal's pages are open for discussion of papers already published, for letters, and for reports of the Society's activities including lectures, workshops, symposia and field excursions. The abstracts of Ph.D. and M.Phil. theses dealing with Caribbean geology will also be published.

Further information concerning the Society and membership is available from: The Secretary, c/o Geological Society of Jamaica, Department of Geology, University of the West Indies, Mona, Kingston 7, Jamaica, W.I.

EDITORIAL CORRESPONDENCE: Papers are normally published in the order of acceptance with priority given to short and concise papers. All material for publication should be sent to the Editor, Journal of the Geological Society of Jamaica, c/o Department of Geology, University of the West Indies, Mona, Kingston 7, Jamaica, W.I.

Notes for the guidance of authors can be found at the end of each issue or may be obtained by writing to the Editor.

BUSINESS MATTERS: Correspondence concerning, and remittances for, subscriptions, back issues, special volumes, offprints and advertising should be addressed to the Secretary.

EDITORIAL

THREE PAPERS which appear in this volume, those by Dr Alan Graham, Dr Chris Paul and Mrs Indira Balkissoon, were originally presented at the L.J. Chubb Centennial Conference, organized by the Department of Geology, UWI, Mona. Oral presentations were made on 14 November 1987, followed by a one-day field trip to the Central Inlier, led by Professor Edward Robinson (field guide published in Volume 24). Abstracts from the residue of papers given at this meeting also appear in this volume. The organizers of the conference wish to ac-

knowledge the financial assistance given by the Third World Academy of Science and the Petroleum Corporation of Jamaica. Dr Winfried Schmidt and Mrs Jennifer Thomas gave valuable assistance with the papers derived from the meeting.

I gratefully acknowledge the assistance of Mr Aubrey Botsford, who prepared this volume for printing, and of my wife, Nasima, for reading the proofs.
